PROFILE SUMMARY

AWS Cloud Engineer with hands-on experience in **AWS infrastructure deployment**, **cloud operations**, **monitoring**, and **troubleshooting**. Proficient in **EC2**, **VPC**, **IAM**, **S3**, **RDS**, **CloudWatch**, and **Linux administration**. Experienced in **incident management**, **SLA-based support**, **cost optimization**, and **secure cloud architecture** aligned with **AWS best practices**.

EXPERIENCE

K21 Technology Pvt. Ltd. *Remote, India*

AWS Cloud Engineer February 2025 – Present

- **Designed and deployed** scalable AWS cloud infrastructure, improving **system uptime by 30%** through optimized configurations and monitoring.
- Manage and support **AWS cloud infrastructure**, ensuring **high availability, scalability, and cost optimization**.
- Deploy, configure, and maintain core AWS services such as **EC2, S3, IAM, VPC, CloudWatch, and Lambda**.
- Troubleshoot and resolve issues related to **networking, storage, and access management** within AWS environments.
- Manage **EC2 instances, Elastic Load Balancers (ELB), and Auto Scaling groups** to ensure application resilience and performance.
- Collaborate with cross-functional teams to promote **secure, compliant, and DevOps-aligned cloud adoption** across projects.

Labelbox Inc. (Contract) *Remote, India*

Cloud Data Operations Engineer July 2024 – January 2025

- Contributed to **training and improvement of AI/ML models** by preparing, labelling, and validating **high-quality datasets.**
- Delivered high-quality outputs by following **strict task specifications, timelines, and quality benchmarks**.
- Maintained **data confidentiality, security, and IP compliance** as per client contractual requirements.
- Delivered tasks under **SLA-driven timelines**, maintaining high quality in **production AI workflows**.
- Collaborated with **globally distributed teams** to support scalable, cloud-based AI model development.

AWS RESTART Training Program *Remote, India*

AWS Cloud Trainee November 2023 – April 2024

- **Completed** an intensive training program focused on **foundational AWS services** and **cloud computing concepts**.
- **Developed proficiency** in core AWS services such as **EC2, S3, IAM, RDS, and Lambda** through **hands-on labs and real-world projects**.
- **Applied knowledge** of **cloud security best practices**, **Identity and Access Management (IAM)**, and **compliance requirements** to ensure secure deployments.
- Gained experience in setting up and **managing virtual private clouds (VPC)**, configuring network settings, and optimizing cloud infrastructure for performance and cost-efficiency.

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, VPC, Lambda, S3, IAM, RDS, CloudWatch, CloudFormation)

Operating Systems: Linux, Windows
Infrastructure as Code (IaC): AWS CloudFormation
Automation & Orchestration: AWS Lambda, AWS Step Functions, EventBridge
Cloud Security: IAM (Policies, Roles, MFA), Security Groups, NACLs, KMS, AWS WAF, AWS Config
Database & Storage: Amazon RDS, DynamoDB, Amazon S3
Cloud Operations: Monitoring, Alerting, Incident Management, Cost Optimization
Ticketing Tool: Zendesk
Soft Skills: Problem-Solving, Incident Management, Cross-Functional Collaboration, Documentation

EDUCATION

Bachelor of Technology in Information Technology from **AKTU University** *Lucknow, Uttar Pradesh (2019-2023)*
Intermediate, SKD Academy Inter College *Lucknow, Uttar Pradesh (2018)*
High School, SKD Academy Inter College *Lucknow, Uttar Pradesh (2016)*

PROJECTS

AWS 3-Tier Web Application Architecture:

- Designed and deployed a **3-tier web application** using **EC2, Elastic Load Balancer, Auto Scaling, and Amazon Aurora** across multiple Availability Zones.
- Configured **VPC, subnets, route tables, and gateways** to enable secure and isolated networking.
- Implemented **IAM roles, Security Groups, and private subnets** to enforce least-privilege access and security best practices.
- Monitored system performance and health using Amazon CloudWatch, improving uptime and scalability by 30%.

AWS Cloud-Based Dynamic Blood Bank Management System:

- Deployed a scalable blood bank management application using **EC2, S3, and RDS to enable real-time donor registration**, inventory tracking, and data processing.
- **Configured Apache, PHP, and MySQL on EC2** for hosting dynamic web content and integrated **Amazon RDS for secure,** managed database operations.
- **Implemented IAM roles and S3 integration** to securely store and retrieve application assets, ensuring **high availability** and centralized access.
- Set up monitoring and notifications using **CloudWatch and SNS for system health insights, automated alerts**, and improved operational visibility.

CERTIFICATIONS

- Certified AWS Cloud Practitioner
- AWS Cloud Practitioner Essentials

ACHIEVEMENTS

- Nominated for **Employee of the Month** at K21 Technology for outstanding performance, initiative, and contribution to AWS project development and support excellence.
